

METHOD AND SYSTEM FOR PROVIDING REMOTE
ACCESS TO THE FACILITIES OF A SERVER COMPUTER

ABSTRACT OF THE DISCLOSURE

- 5 A method and system for providing remote access to the facilities of a server computer are provided. A site integration application programming interface at a co-branded Web site. The site integration application programming interface exposes a number of servlets that may be executed in response to requests received from a business partner Web site over a secure communications link. The servlets provide functionality for accessing the user registration and deletion facilities of the co-
- 10 branded Web site. Moreover, the servlets also provide access to other administrative facilities provided at the co-branded Web site. The servlets also provide functionality for authorizing a user to access the co-branded we site. This servlet may be executed in conjunction with the login facilities of the business partner web site to permit concurrent login at both sites.
